IN THE CLAIMS:

Claims 39, and 41-45 (Canceled) Please amend the following as follows:

- 37. (Currently amended) An isolated and substantially pure N-methyl-Daspartate receptor subunit encoded by a DNA sequence[,] comprising a sequence of nucleotides that encode an human N-methyl-D-aspartate receptor subtype, wherein said sequence of nucleotides is as set forth in SEQ ID No. 57.
- (Currently amended) A substantially pure human N-methyl-D-aspartate 38. receptor subtype subunit comprising the sequence of amino acids [as] set forth in SEQ ID NO: 58.
- 40. (Currently amended) A method for detecting a binding partner for the receptor of claim [37] 38 in a sample suspected of containing the binding partner, comprising:
 - contacting the sample with the receptor under conditions favoring binding (i) of the receptor to the binding partner;
 - determining presence of the binding partner in the sample by detecting (ii) binding of the receptor to the binding partner.
